

BUILDING SAFETY ACT

What sets AG apart from other firms handling Building Safety Act (BSA) matters is our ability to provide specialist advice on the whole asset life cycle which includes: planning, construction, funding, through to occupation, regulatory compliance and claims/redress. Teams across our business come together to provide a seamless service; we combine the specialisms behind the scenes so you don't have to. Members of our dedicated BSA team are used to working together and understand fully where there are overlaps between their areas enabling them to provide the best outcome for clients.

Having worked with many clients across the real estate sector on all aspects of building and fire safety since the Grenfell tragedy, we have developed bespoke tech solutions for clients to run large scale BSA audits across their portfolios, manage onerous administrative processes such as serving landlord certificates, and ensure that monitoring progress and reporting to stakeholders is accurate and straightforward. We have market leading experience across all work streams.
