

# ADVISING ON IMPACT INVESTING

---

## **Some more recent examples where we help our fantastic clients invest with impact.**

AG have worked in conjunction with Foresight, a company who've had ESG at the forefront of their strategy for 35 years.

Their mission is to develop and execute compelling investment strategies for the long term. They aim to invest in a manner that supports sustainable economic and social development, and are conscious of the contribution they make to society.

### **Palatine**

We have been advising Palatine on the acquisition of Estio Training. Estio training offers a range of IT and digital apprenticeship programmes, including data analyst, infrastructure technician and software developer roles. It currently has more than 750 apprentices on programme across its Leeds, Manchester and London sites.

### **Palatine**

Advising founders on the investment by Palatine in Veincentre. Veincentre delivers specialist treatment for varicose veins, using Endovenous Laser Ablation (EVLA). Utilising EVLA – a non-invasive, non-surgical procedure – Veincentre can reduce the surgical and recovery times associated with traditional forms of treatment, meaning patients can often have their veins treated in their lunch-hour. EVLA also significantly reduces scarring, limiting the damage done by the condition.

### **Advising on acquisitions**

AG advised our client on the acquisition of Estio Training. Estio offer a programme of training combined with paid employment. They deliver industry-leading training around the country. With a dedicated team, they match talented people to fantastic career opportunities. Over 94% of our new recruit apprentices go on to full time employment.
